VITOR BERGE SATO

I am graduated in Architecture, and I work with the creation and development of projects. I like to learn new skills, I'm multitasking, collaborative, and proactive. I have critical thinking, I analyze processes to improve them, and I identify problems and propose solutions.

EDUCATION

Architecture and Urbanism
University of Sao Paulo
2016-2022

IV Seminar Urbanism and Urbanists in Brazil
Belo Horizonte
2019

13° Seminar Docomomo Brazil
Salvador
2019

XX ENANPUR
Belem
2023

CONTESTS

12° Brazilian Steel Construction Contest (CBCA)
2019

Senac BH
IAB National Contest
3rd Place
2021

Maritime Museum of Brazil
IAB National Contest
2021

CERTIFICATES

Archicad BIM User
Graphisoft
2023

LÍNGUAS

Portuguese	native
English	advanced
Spanish	advanced

PROFESSIONAL EXPERIENCE

Obra Arquitetos 2020 – current

Architecture office founded in 2004, which carries out institutional and residential projects, and manages construction works. Several of its projects have been published in national and international portals and magazines, such as ArchDaily, Vogue and GA Houses. Some were also awarded by institutions such as Brazilian Institute of Architects (IAB) and Brazilian Association of Metal Construction (ABCEM).

I joined the office as an intern, and I was hired as an architect later. I participate in all stages of the architectural project, from the first feasibility studies, developing a design, 3D model and physical model, to the executive project, detailing all parts of the building process. I relate with clients to understand their desires and needs, and I present solutions and the result of the work. I manage the compatibility of complementary projects with other teams. I monitor constructions to ensure that the idealized project is executed with fidelity and quality. In design competitions I had the opportunity to creatively explore architectural visualization and graphic representation. I was responsible for the implementation of the Archicad BIM system in the office workflow.

LABPLAN – Laboratory of Urban and Regional Planning 2018 - 2020

I carried out two research projects in which I organized and historiographically studied archives of unpublished documents, promoting the production of knowledge about the history of architecture and urbanism in Brazil. The results of these surveys were published in articles and presented at national seminars.

SKILLS

Architecture

Archicad - BIM
Revit - BIM
AutoCAD

3D

SketchUp
Rhino

Office

Office - Word, Excel
Kanban

Design

Photoshop
InDesign
Illustrator

Render

Lumion
Twinmotion
VRay

Other interests

Woodwork
Photography
Coding
